

Instructions for Research Goes Red Data Challenge

Workspace and data

- The data locates at the workspace: /mnt/workspace/Research_Goes_Red/v4_2023-02.
- All csv data that corresponds to each survey are under the **Data** subfolder.
- The tutorial notebooks were provided under the **Tutorial Notebooks** subfolder.
- Surveys forms and data dictionary were provided under the **Documentation** subfolder

Although there are multiple surveys available, we encourage you to focus on the following surveys, which are most relevant to the topics in the data challenge:

- Demographics, socioeconomic, self-reported clinical diagnosis, most important concerns
 - Tutorial notebooks
 - 01_Data_Fundamentals.ipynb
 - 02_RGRsurvey.ipynb
 - Surveys
 - Registry Enrollment
 - Project Baseline Registry Profile Completion
 - Research Goes Red survey
- Health perceptions and experiences
 - Tutorial notebooks
 - 05_HEP. ipynb
 - Surveys
 - Healthcare Experiences and Perceptions
- Reproductive Health
 - Tutorial notebooks
 - 03_RHS. ipynb
 - Surveys
 - Reproductive Health Survey

Submitting Results/Notebook

Once analyses are complete and the notebook is ready for submission, per the criteria outlined above, follow the steps below to submit the notebook for review. `

1. The submitted notebook should be in HTML format. In Jupyter, follow these steps:
 - a. In the File Menu, selecting Download as > HTML (.html). The HTML file will download to a temporary downloads folder.
 - b. Re-upload the HTML file to the workspace by clicking the upload icon in JupyterLab or clicking the Upload button on the Jupyter Home tab.
2. In the workspace, save the notebook in the /mnt/workspace/Export_Files directory as this will sync the notebook to the workspace page in the portal.

3. The notebook will be listed under the Export Files tab on the workspace page in the portal. To the right of the notebook, click the box with the arrow that shows “Share for Grant Application” when you hover over it.
4. Sharing the notebook creates a static link that will be used by the Data Challenge peer review team.

Note: Only information in the notebook will be visible to the peer review team. Therefore, it is imperative that you include everything necessary before sharing. If you make changes after sharing, you will have to re-share.
